## DETAILED ACTION

### *Double Patenting*

1. Claims 1-5 and 7-20 of this application conflict with claims 1-11, 13-17 and 19-21 of Application No. 09/807,133. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

2. Claims 1-5 and 7-20 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11, 13-17 and 19-21 of copending Application No. 09/807,133. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

3. *Claim Rejections - 35 U.S.C. § 112*

4. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what comprises the processing of an optical element.

Art Unit: 3737

5. *Claim Rejections - 35 U.S.C. § 102*

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

7. Claims 1,3 and 6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Bille et al '687.
